

Language Change Procedure

This procedure foresees the availability of a USB PenDrive (USB 1.1 or 2.0) with at least 16 MBytes of memory: besides this, it is necessary the CD "System Languages" and a PC with Windows 2000 / XP / Vista

Using the following procedure it is possible to change the language used by the device to send vocal messages to the customer and used by the customer to send vocal commands to the device.

The procedure doesn't change the language of the texts displayed on the Dashboard of the car

- 1) delete all files from the USB Pen Drive
- 2) Copy into the main folder of the PenDrive the 3 files of the language that you are going to download into Blue&Me. Example: if you want to install French language, the following files are required:

Take Care : INSTALL.INF file has the same name for all languages but the content changes for each language. So, never mix these files

- 3) Remove the PenDrive from the PC after the de-activation (hardware remove of Windows)
- 4) Go into the car
- 5) Run a Key-Off / Key-On
- 6) Wait 10 seconds nearly and insert the PenDrive into the USB Connector
- 7) Within few seconds (1 or 2 not more) there will be a vocal announcement "download started" in the original language. A similar message is written onto the display of the Dash Board.
- 8) After nearly 35 seconds the download ends. There will be another vocal announcement in the new language and another text displayed on the Dash Board
- 9) Remove the PenDrive
- 10) Procedure ended

This procedure is valid for whichever FIAT Group car equipped with
